Art Unit: 1743

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10, 13-16, 18, 20-25 and 27-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 10 and 18 are vague and indefinite what steps are required to accomplish the "polymerizing". Line 3 in claim 10 and line 6 in claim 18, " a monitor structure" should be changed to a –first monitor structure—in light of the 10/2/06 amendments. Similarly, line 13 and 7 respectively "the monitor structure" should be changed to the –first monitor structure—in light of the 10/2/06 amendments.

Claims 10 and 18 10/2/06 amendments specify "a second monitor structure". It is not clear what this structure is, how it is made and what it does.

Claim 10 is vague and indefinite what is intended by "... the monitor structure generates ... independent of the size... having a predetermined value". How can the display be independent of size? Depending upon the size the monitor will have different characteristics. Additionally, these limitations are drawn to physical characteristics and it is not clear how this language further limits the method claims. Finally, the last two lines of claim 10 "the second predetermined value" are not clear how the visual display is generated, what the second parameter is and what is the signal.

Claims 13 and 21 are not clear what steps are required to accomplish the claimed "cleaning the channel) (e.g. is the cleaning accomplished by a solvent, water, air?) and. "polymerizing".

Allowable Subject Matter

Claims 10, 13-16, 18, 20-25 and 27-28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art fails to teach a device with a second monitor structure that gives a visual display in response to a second parameter in the fluid.

Response to Arguments

Applicant's arguments filed 10/2/06 have been fully considered but they are not persuasive.

Applicants' amendments have clarified the prepolymer mixture is the pregel.

Applicants' do not understand the Office's concern with the claimed "polymerization" language because "polymerization" techniques are well known in the art. The Office notes there are many different ways to accomplish polymerization. One having ordinary skill in the art would not know which polymerization method is suitable for the instant invention. Clarification could be achieve by claiming the necessary steps/reagent to accomplish the polymerization as taught by page 6 line 28 through page 7 line 30 of the specification.

Art Unit: 1743

Applicants' do not understand the Office's concern with the claim language "... the monitor structure generates ... independent of the size... having a predetermined value". The Office does not understand how the visual display of the monitor can be independent of size. Is this true for a nano-scale device compared to a football field sized device?

Applicants' state the specification clearly teaches on page 7 line 30 through page 8 line 1 what is intended by "cleaning". Clarification could be achieved if Applicants were to claim these steps.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 1743

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lyle A. Alexander whose telephone number is 571-272-1254. The examiner can normally be reached on Monday, Wednesday and Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
